INFORMATION IMPORTANTE / IMPORTANT INFORMATION

FR

A lire attentivement. Conserver ces informations pour un usage ultérieur.

AVERTISSEMENT

Malgré les précautions de protection, il peut y avoir un risque de coupure au montage. Pour éviter cela, nous recommandons le port de gants de sécurité EPI (Equipement de Protection Individuelle).

Les fixations ne sont pas incluses car leur choix dépend du matériau du mur sur lequel est fixé le cache. Utilisez des fixations adaptées au matériau du mur et du sol.

Visserie de fixation à prévoir : M6.

Nous vous recommandons des visseries de fixation traitées anti-corrosion.

Prévoir une surface au sol solide et plane, de dimensions suffisantes^(*) pour accueillir l'habillage de votre équipement.

Pour obtenir des conseils sur les fixations à utiliser, adressez-vous à un revendeur spécialisé.

Nous recommandons la présence de 2 personnes pour le montage.

Ne pas monter sur le produit. Modèle conçu pour supporter une charge de 15kg maximum.

(*) voir configurateur - dimensions minimales (largeur et profondeur en mm) variables selon la taille et le modèle retenus.

Règlementation d'installation d'une pompe à chaleur

L'installation d'une pompe à chaleur ou d'une climatisation doit être réalisée conformément aux recommandations du fabricant et dans le respect des réglementations en vigueur du NF DTU 65.16.

Pour favoriser une circulation d'air optimale, nous recommandons de laisser le minimum d'espace entre la face avant du cache et l'appareil.

GB

Read carefully. Keep this information for further reference.

WARNING

Despite the protective precautions, there may be a risk of cuts during assembly. To avoid this, we recommend wearing PPE (Personal Protective Equipment) safety gloves.

Fixing devices are not included as their choice depends on the material of the wall to which the cover is attached. Use fixing devices suitable for the walls and floor in your home.

Screwing elements (not provided) : M6.

We would recommend you using screwing parts protected against corrosion

Make sure to have a strong and levelled floor surface, of correct dimensions^(*) for installing the covering on your equipment.

For advice on which fixing devices to use, contact a specialist dealer.

We recommend the presence of 2 people for the mounting.

Do not climb onto the product. Model designed to support a maximum load of 15kg.

(*) see configurator - minimum dimensions (width and depth in mm) linked to the size and selected model.

Installation regulations for a heat pump

The installation of a heat pump or air conditioning should be carried out in accordance with the manufacturer's recommendations and in compliance with local codes and standards.

To promote optimal air circulation, we recommend leaving the minimum space between the front of the cover and the device.
